

Highlights

- **Socially responsible investing** viewed through a common-sense lens
- **“Price follows earnings” philosophy** – seeking companies with the ability to consistently grow their top and bottom lines
- **Focus on multinational firms** with consistent profitability, and strong balance sheets that we believe are not overly reliant on the economic cycle

Portfolio Parameters

- 30-40 positions with security and sector exposure limits
- Maximum position size of 5%
- Maximum GICS sector weight capped at greater of 150% of benchmark or 15% of portfolio
- Fully invested approach with <5% cash exposure
- No derivatives or leverage

Investment Philosophy

Our guiding principle is “Price Follows Earnings.” We believe stock prices are driven by earnings. We employ a bottom-up investment process to identify securities with strong growth characteristics, fundamental strength, and compelling price appreciation potential.

We seek to consistently outperform the S&P 500 by identifying high-quality companies that grow their earnings faster than their peers and the overall market and trade at attractive valuations. Our focus is multinational firms with consistent profitability and strong balance sheets that we believe are not overly reliant on the economic cycle.

The Glynn SRI Quality Growth strategy is a long-term buy-and-hold strategy and should be expected to exhibit low annual portfolio turnover, the majority of which is driven by our philosophy of trimming successful positions to realize gains.

Investment Process

Eligible portfolio securities include both US stocks and ADRs with market capitalizations above \$3 billion. We use a proprietary screening process focused on attractive growth characteristics, strong balance sheets, manageable debt, and rational valuation to narrow our research to a tractable universe.

Next, fundamental analysis enables us to bring clarity to the long-term market opportunity, durability of a company’s competitive strength, growth and profitability drivers, management quality, and exposure to ESG risk. Our experience and long-term focus are vital to maintaining conviction through the rough spots and negative headlines that frequently occur.

We strive to position our portfolio to participate in rising markets but also protect capital in difficult market conditions. We believe that this has been the key to achieving strong long-term returns. We strive to beat the benchmark (S&P 500) while exposing our investors to less risk throughout the economic cycle.

Top 10 Holdings¹

Security	% of Portfolio
Apple Inc.	5.1%
Microsoft Corporation	4.7%
NVIDIA Corporation	4.5%
Alphabet Inc. Class C	4.4%
Amazon.com, Inc.	4.4%

² Source: Sustainalytics. ESG Risk Score considers a company's sensitivity or vulnerability to ESG risks. Lower risk scores indicate that the constituent companies face less ESG risk. ESG Risk Categories – Negligible: 0-10, Low: 10-20, Medium: 20-30, High: 30-40, Severe 40-100. ESG Risk Exposure considers a company's sensitivity or vulnerability to ESG risks. Scores determine exposure to material ESG issues: Low: 0 - 35, Medium: 35 - 55, High: 55 - 100.

Disclosures

The name of this JAG composite is Glynn SRI Quality Growth. There is no guarantee that an investment with the strategy will meet its investment objectives. Performance is reported in US Dollars. **Past performance is not indicative of future results. Any investment contains risk including the risk of total loss.**

All Sector Weightings, Top 10 Holdings, and Portfolio Characteristics are based on an actual representative portfolio of the composite strategy. The index comparison is appropriate for the following reason: The Standard & Poor's 500 Total Return Index is an unmanaged index consisting of 500 companies generally representative of the market for the stocks of companies in leading industries of the US economy. This index comparison is used for comparison purposes only and is not meant to be indicative of a portfolio's performance, asset composition, or volatility. The performance of the Composite may differ markedly from that of compared indices due to varying degrees of diversification and/or other factors. Individuals cannot invest directly in any index.
